Feedback

All your inventory, in one place

With one independent overview of your inventory across the globe, you can effortlessly manage your stocks and always stay in the loop, making informed decisions.

Automatic sync

Keep your inventory in sync, from order sources to warehouses

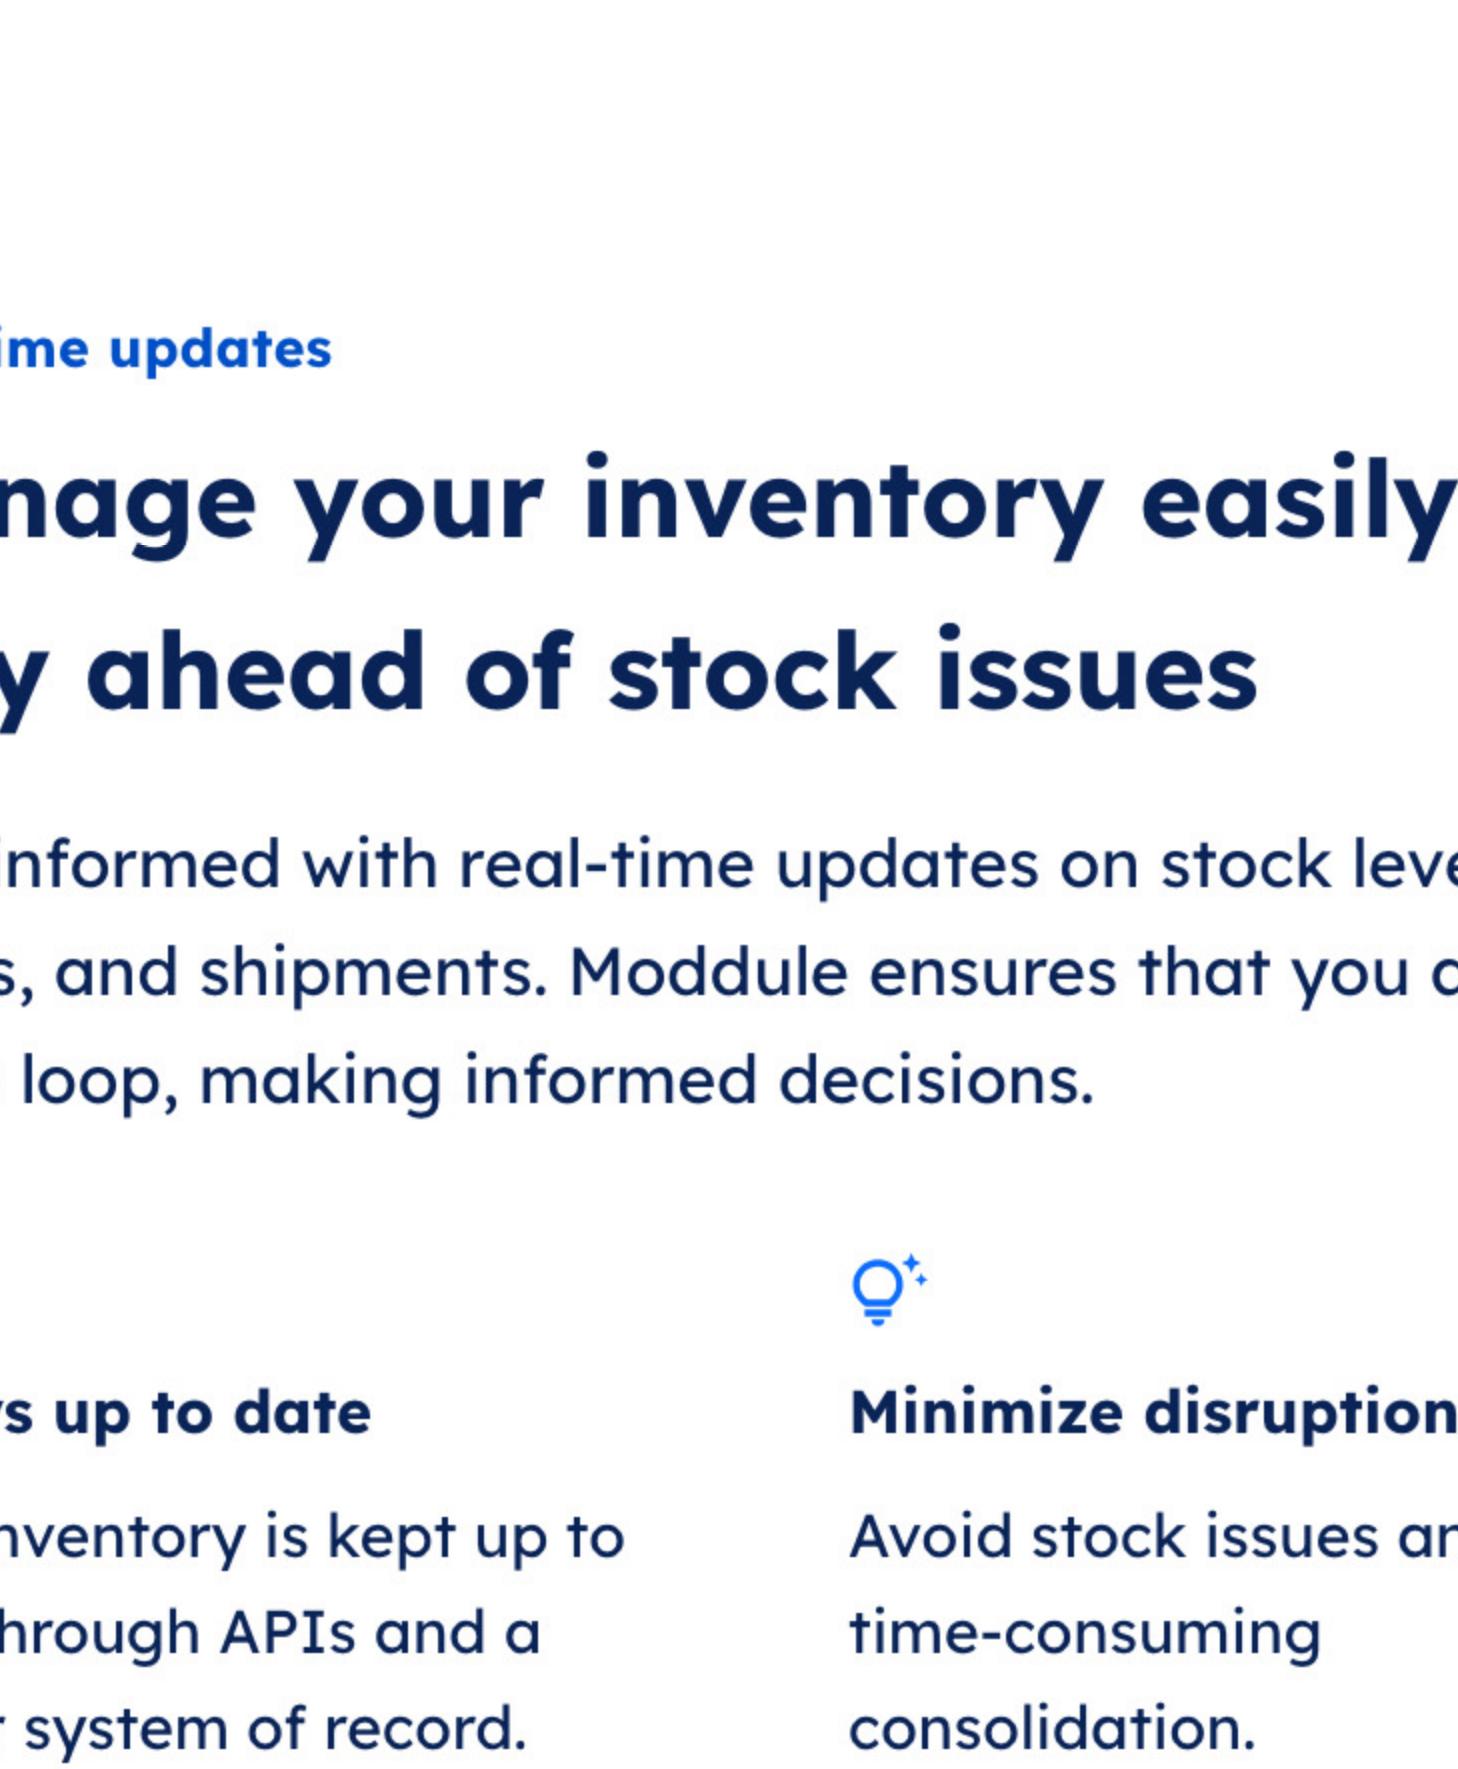

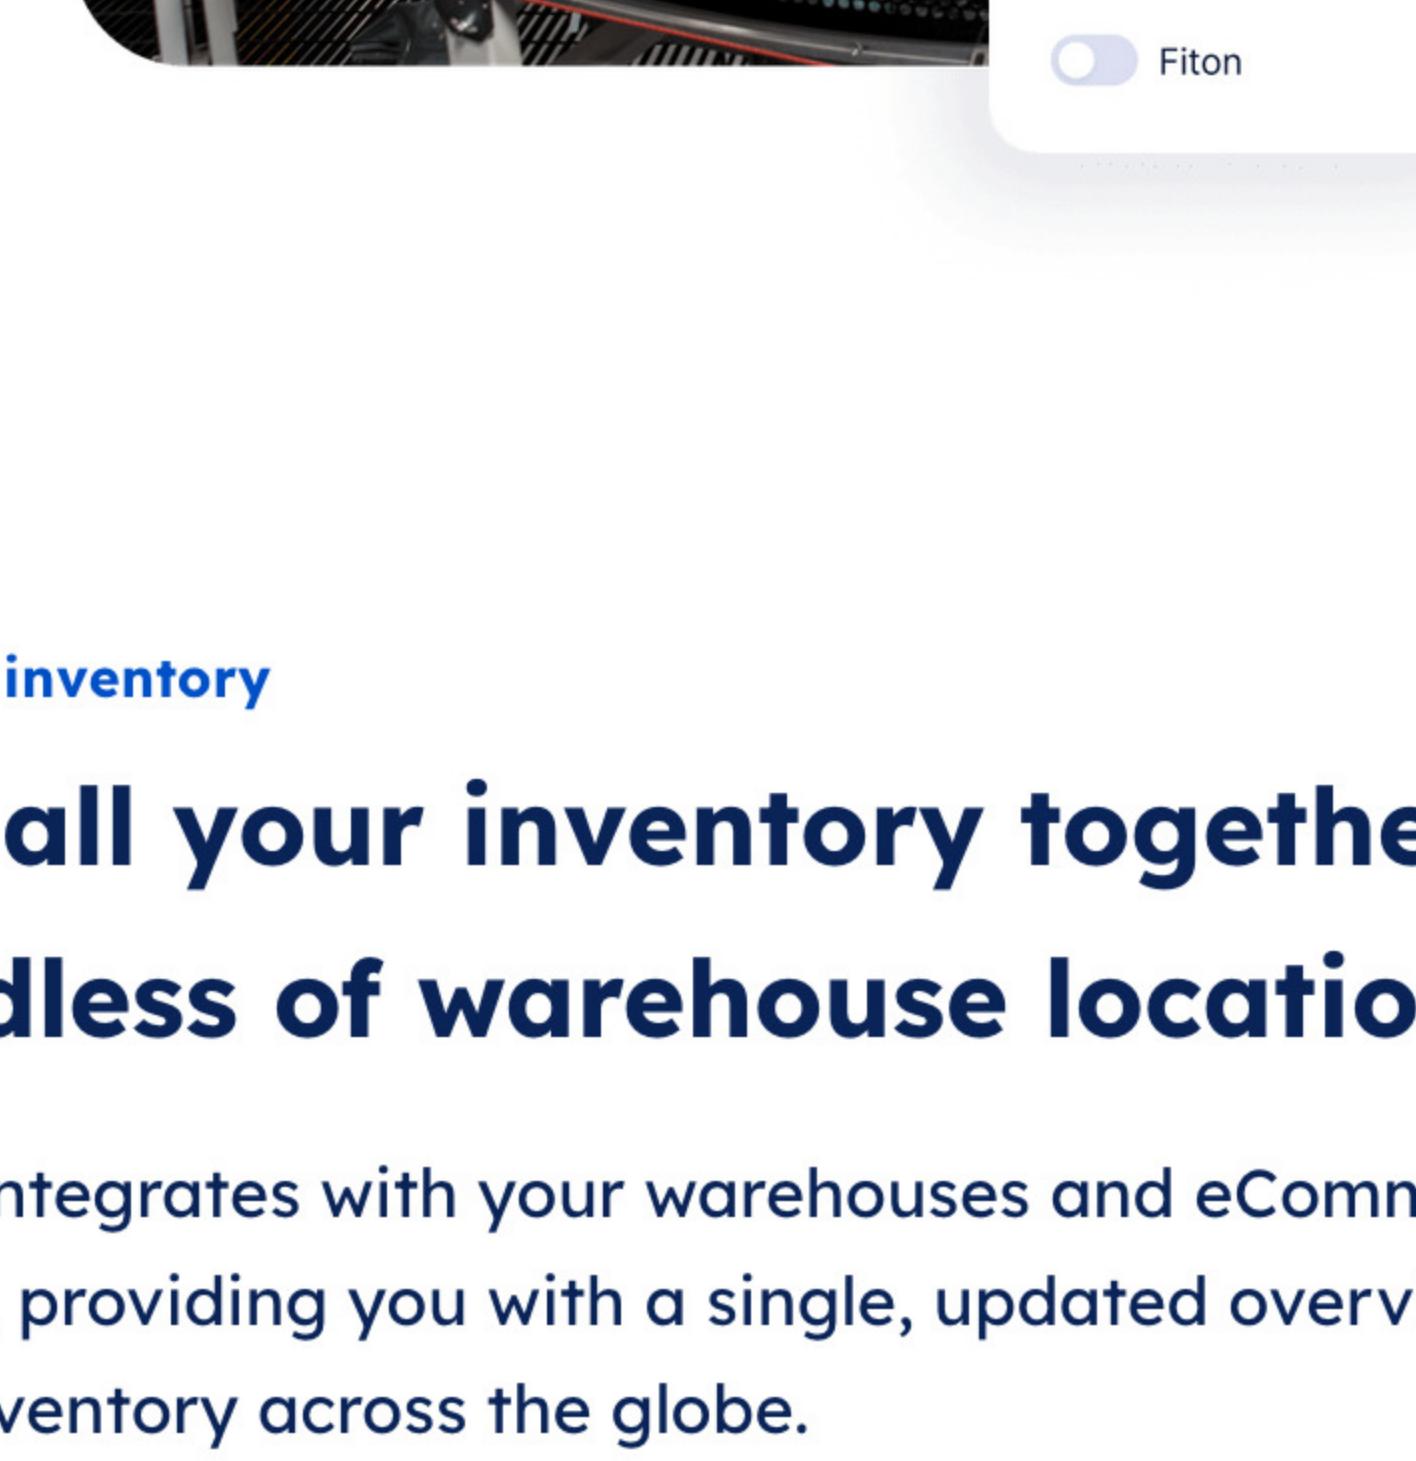

Avoid stock issues by keeping your inventory automatically synced between your order sources and your warehouses, ensuring a perfect alignment at all times, seamlessly.

 **Customisable**

Define how the syncing should work.

 **Adjustment log**

All adjustments logged per SKU for complete control.

Centralised inventory

Bring all your inventory together regardless of warehouse locations

Moddule integrates with your warehouses and eCommerce platforms, providing you with a single, updated overview of all your inventory across the globe.

 **Warehouse integrations**

Integrate with any warehouse around the world, regardless of WMS.

 **Flexible technology**

From API to CSV/FTP file transfers, we can meet your requirements.

Real-time updates

Manage your inventory easily and stay ahead of stock issues

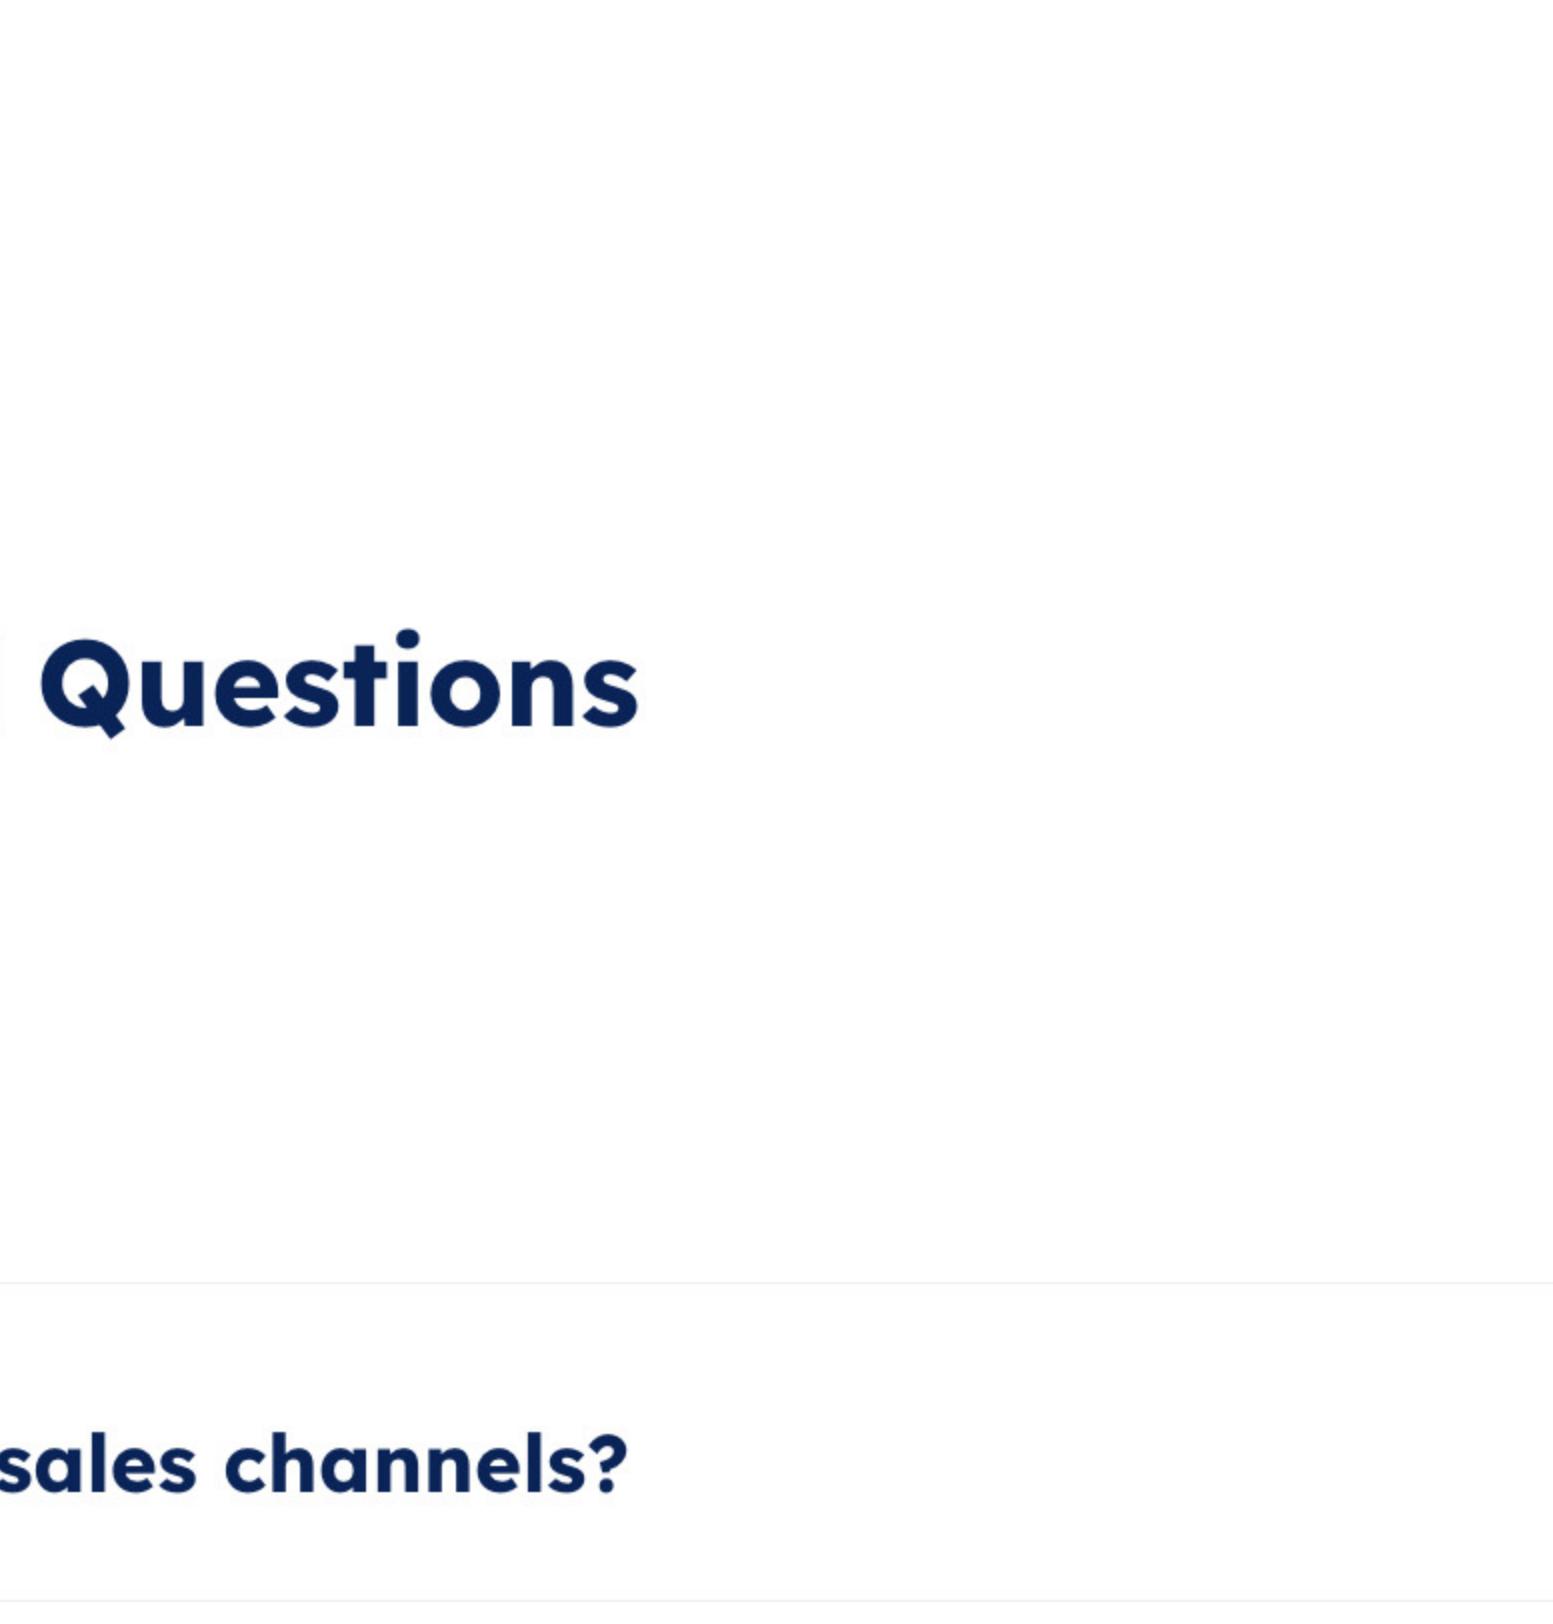

Stay informed with real-time updates on stock levels, order status, and shipments. Moddule ensures that you are always in the loop, making informed decisions.

 **Always up to date**

Your inventory is kept up to date through APIs and a ledger system of record.

 **Minimize disruptions**

Avoid stock issues and time-consuming consolidation.
